*Plastics for
a sustainable future*

Our mission

We support our partners in their pursuit of sustainable production and effectively reduce their carbon footprint.

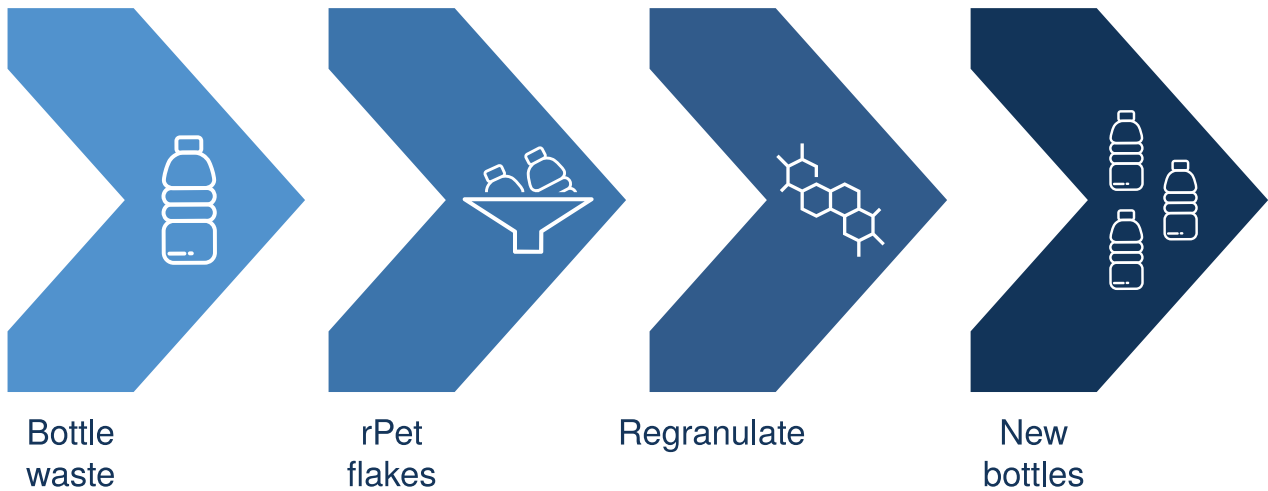

International distribution of recyclates is one of the key branches of our company. We work with customers and suppliers around the world, offering the highest quality recycled materials, thus supporting companies in achieving sustainable production.

Why recyclates?

- ✓ Protecting the environment by reducing waste and CO₂ emissions
- ✓ Achieving sustainable production goals
- ✓ Reduction of raw material and energy costs

PET plastic recycling process:

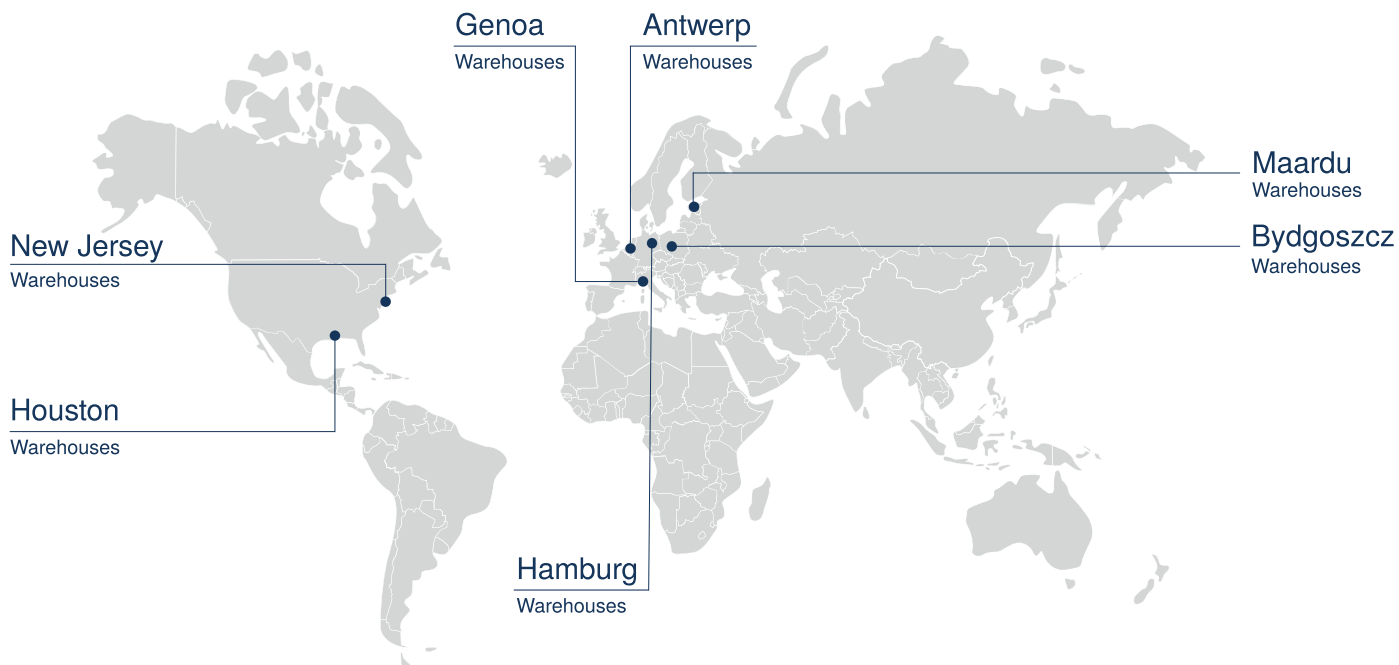

Creating recycled PET flakes is an important step towards sustainable production and reducing the consumption of natural resources. Thanks to recycling, plastic waste can be used as valuable raw materials for the production of new products, reducing the need to extract new raw materials and limiting the negative impact on the environment. At the same time, such activities contribute to increasing economic efficiency and create business opportunities within the circular economy.

Advantages of closed loop:

Working towards zero emissions | Environmental responsibility
Better company image | Effective use of resources

**With years of experience and continuous development of competence,
we offer professional distribution, becoming a leader
in the sectors served**

About the group

**Business activity
in 30 countries**

**€180 million
in turnover**

**100%
Polish capital**

**330 employees
in the group**

**Family-owned
company**

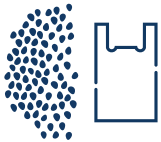

**40 years
of experience**

A wide portfolio of plastic recyclates:

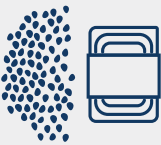

rPET

regranulat food grade, post-production regrinds, flakes

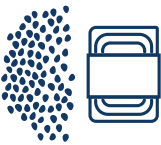

rHDPE

regrinds of caps, post-production regrinds, regranulate

rPP

injection regranulate

rPS

HIPS and GPPS in the form of regranulate

rABS

regrinds, regranulate

- Additional quality control of offered plastic recyclates
- Logistics support - transport, customs clearance, etc.
- Warehouse support - the ability to store goods for customers
- Flexible payment terms
- Market insight and support in making the best purchasing decisions by our customers
